EXPLORING VARIOUS UI INTERACTION PATTERNS

Date:

Aim:

To design an online dress shopping application to explore various UI interaction patterns using Figma.

Algorithm:

Step-1: Start.

Step-2: Create a new project for the application.

Step-3: Design the introductory page with get started button.

Step-4: Design the login page of the application with user's email id and password text fields and login button.

Step-5: Add a signup page for new users.

Step-6: Create a page for loading and another where the main page is directed which contains search bar, carousels and some dress images to buy.

Step-7: Create a page for the selected dress to inspect about it and a button to add to cart.

Step-8: Create a page which depicts "My Cart" which has the items that are added and also a back button.

Step-9: Create a payment page and its success page, and include progressive bar and tooltips for the required pages and button hovering.

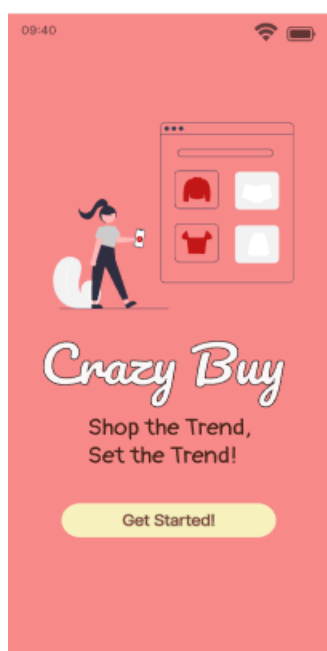

Step-10: Include navigation for all the pages.

Step-11: Stop.

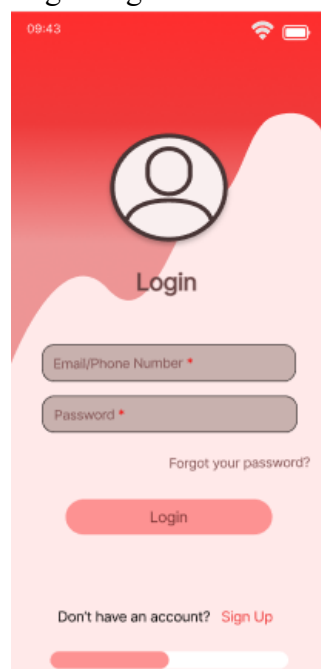

Output:

Online Shopping Application:

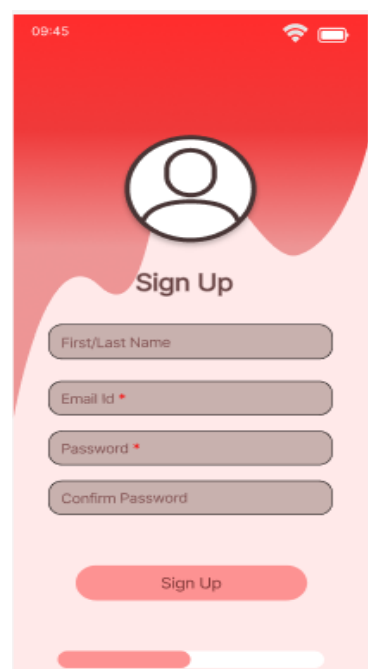

Get Started:

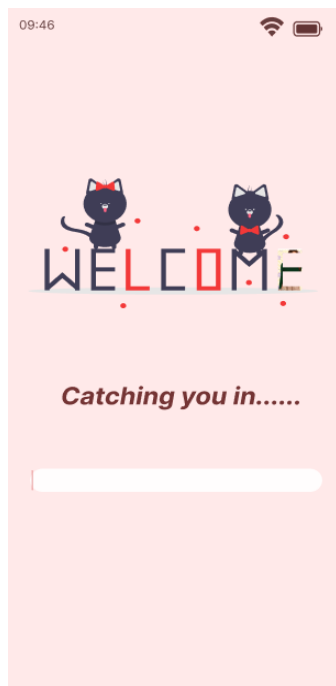

Login Page:

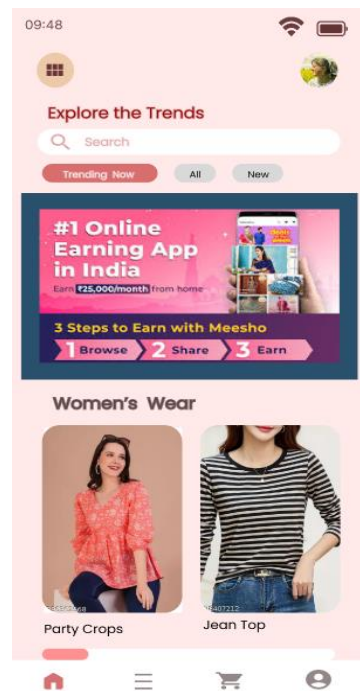

Create Account:

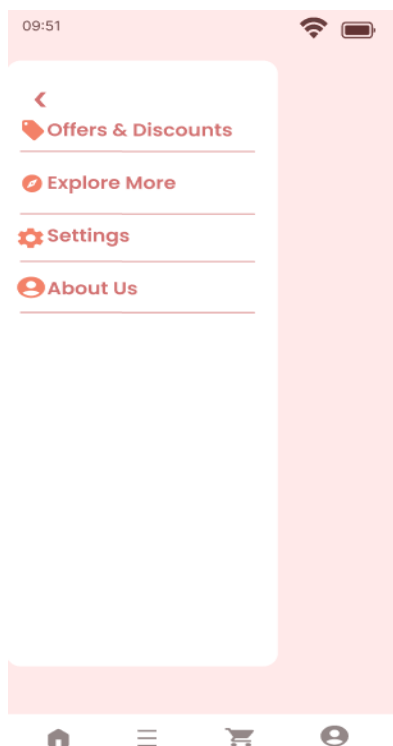

Loading Page:

Main Page:

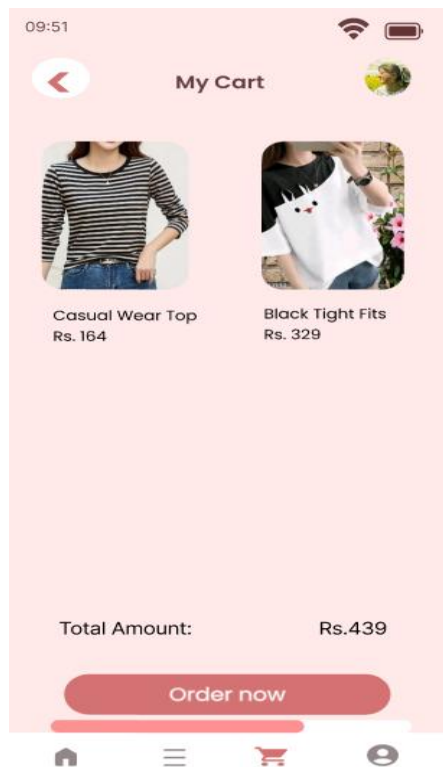

Slide Bar :

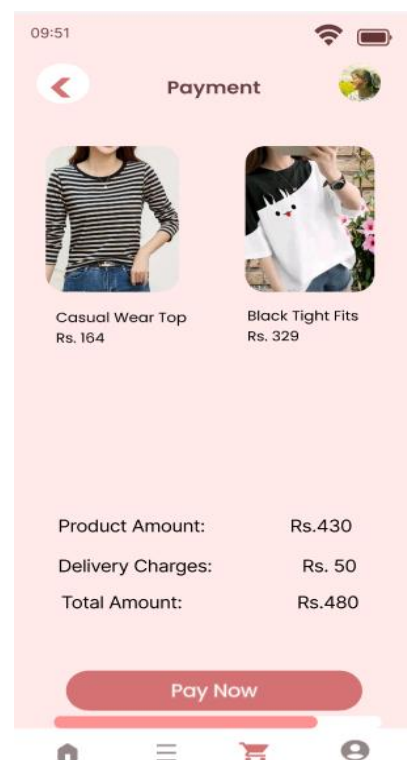

My Cart:

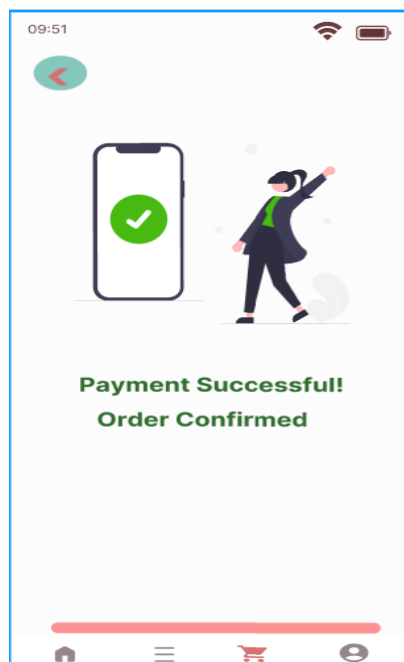

Price Page:

Payment Page:

Payment Success Page:

Result:

Thus, designing an online dress shopping application to explore various UI interaction patterns using Figma was completed successfully.
